

29 typů Motobatt uspokojí 160 různých specifikací

- Moderní AGM technologie
- Uzavřené články, bez nebezpečí úniku elektrolytu
- Vylepšená konstrukce pro potřeby motocyklů, skútrů, a malých vozidel
- Připraveno k okamžité montáži
- Dlouhá životnost i v náročných podmínkách
- Velmi variabilní a jednoduchá instalace
- Záruka 24 měsíců

Důvěřujte Motobatt bateriím AGM

Vyšší výkon

Citlivou otázkou při konstrukci motocyklu je umístění a velikost akumulátoru. Konstruktéři byli a jsou nuceni šetřit místem. Vede to nejen k obrovské variabilitě typů baterií, ale často i k poddimenzování prostoru pro motocyklovou baterii. Klasická konstrukce tzv. mokrého akumulátoru pak často poskytuje výkon na samé hranici skutečné potřeby vozidla. Nedostatek rezervní kapacity zkracuje životnost baterie, zvláště v režimu nepravidelného provozu.

Díky použití technologie AGM (Absorbed Glas Mat) bylo u baterií Motobatt možné zvýšit plochu a počet olověných desek v jednotlivých článcích. Tím se výrazně zvyšuje výkon, kapacita i spolehlivost v poměru k jejich objemu a váze.

POZOR!!!

Mnoho typů „LOW-COST“ baterií může být laciných jednoduše proto, že obsahují méně olova a více kyseliny. Taková baterie vás ale brzy nechá na holičkách.

Provozní odolnost

Absorbed Glas Matt - zkráceně AGM patří mezi uzavřené, tzv. ventilem řízené baterie. Prostor mezi deskami nevyplňuje pouze kapalný elektrolyt, ale každá z olověných desek AGM článku je obalena skelným rounem, do něj je klasický elektrolyt nasáklý. Baterie tak sice funguje na stejném principu, ovšem rounové separátory jí dávají hned několik výrazných výhod:

- Motobatt je odolná k vibracím - dlouhodobým působením vibrací může dojít k uvolnění desek a v konečné fázi až k jejich propojení, tedy ke zkratu článku. Motobatt díky skelným separátům odolá i silným vibracím.
- Motobatt redukuje nebezpečí zkratu článku vlivem sulfatace (v angličtině tzv. mechový efekt) - krystalky síranu olova tého uvolněné z desek klasického akumulátoru mohou elektrolytu migrovat a často dochází k jejich vzpříčení mezi + a - deskou čímž dojde ke zkratu článku. V bateriích AGM tento problém odpadá.
- Vyšší odolnost Motobatt k hlubokému vybití – zatímco běžné baterii škodí již několik hodin na úrovni vybití kolem 50%, AGM baterie dokáže jít bez výrazné ztráty celkové kapacity až na hodnotu 70% vybití.
- Odolnost Motobatt k různým režimům provozu - pro motocykly (a jiné podobné vozidla) je charakteristický nepravidelný provoz, tedy častá období kdy baterie zůstává v nedobytném stavu. Oproti klasické konstrukci umí separátory AGM výrazně zpomalit přirozenou sulfataci článků.

QUADFLEX technologie

V řadě Motobatt lze až překvapivě snadno najít baterii přesně pro váš model. Téměř neúnosnou variabilitu rozměrů a též způsobu instalace bylo nutné rázně vyřešit.

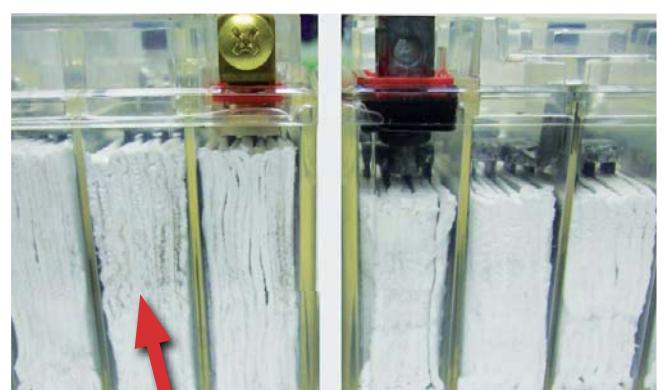

Název „QUADFLEX“ sdružuje hned několik chytrých konstrukčních prvků:

- Motobatt zdvojené +/- póly - patentovaný systém umožňuje instalaci většiny baterií v obou gardech: jako levou i pravou; zároveň je možno na dva volné póly připojit další spotřebič, či pevný konektor nabíječky CTEK.
- Motobatt univerzální vývody pólů – patentovaný systém pro instalaci libovolného typu i směru vývodů (nahoru, do boku, dolů).
- Motobatt stavebnice – pro dodání přesných rozměrů a utěsnění baterie v konkrétním modelu motocyklu se využívá speciálních, přesně vylisovaných nástavců, jejich kompletní sada je vždy standardem každého balení.

Díky chytrým QUADFLEX prvkům dokáže jeden typ Motobatt plnohodnotně nahradit až 11 typů baterií klasické nomenklatury Yuasa.

Velikost a tloušťka olověných desek přizpůsobená pro každý typ Motobatt zvlášť, vyplní bezezbytku celý objem nádoby. Právě tohle, společně s poctivou konstrukcí zajišťuje bateriím Motobatt extra startovací proud i potřebnou rezervu kapacity.

„Ve vatičce“
Hutnější skelné rouno AGM článků Motobatt zajišťuje dokonalou ochranu olověných desek a zároveň nebrání rychlému pohybu iontů při zátěži (např. start)

1. Baterie Motobatt jsou dodávány ve stavu 95-100% nabití, tedy schopné okamžité montáže do vašeho vozidla.

2. Baterie Motobatt jsou dodávány s následujícím příslušenstvím:
- 2 x připojitelný pól (L, nebo U tvar dle typu baterie)
 - 4x nerez šroub na póly (standard)
 - 1x imbus klíč (standard)
 - 0-3 plastové nástavce (dle typu baterie)

3. Odstraňte zátky z inzertních otvorů pro póly na požadované straně. Nevyužité otvory je naopak vhodné zazátkovat.

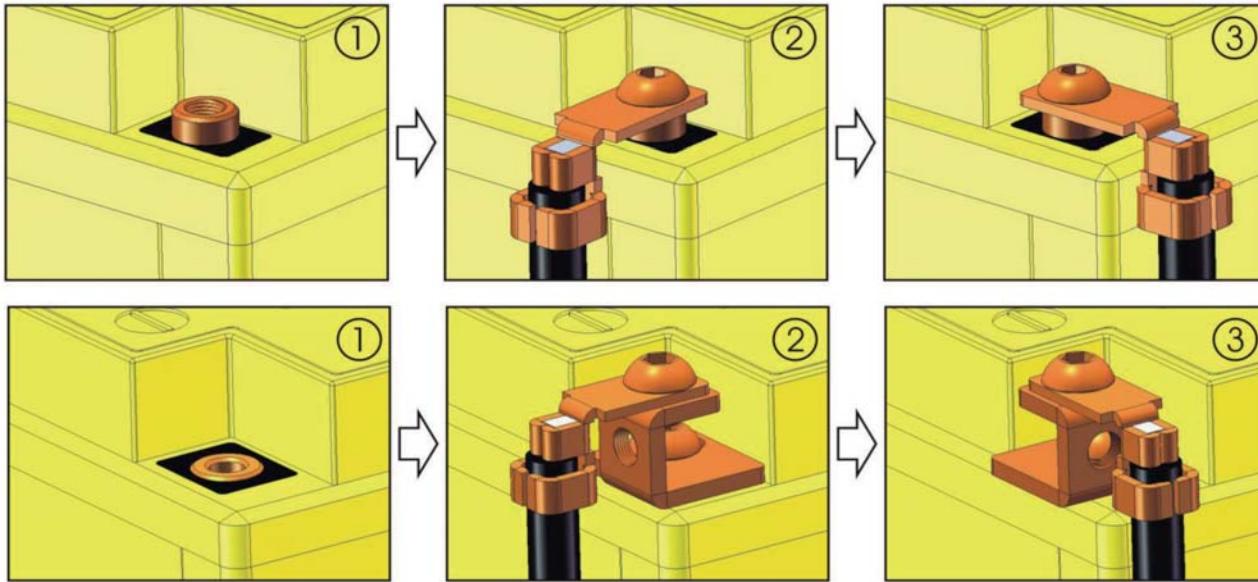

4. Do odkrytého inzertu namontujte pomocí imbus klíče a nerezových šroubů měděné póly a přiměřeně dotáhněte.

5. Dle potřeby použijte přiložené plastové nástavce k dokonalému usazení baterie v prostoru pro akumulátor (bez obav - v porovnání s originální baterií bude mít Motobatt vždy stejnou, nebo vyšší Ah kapacitu)

6. Na přání lze dodat i sadu extra pólů pro montáž na volné vývody (inzerty). Takto na přímo lze alternativně připojit například napájení navigace, konektor nabíječky CTEK (viz. obrázek) a podobně.

POZOR!!

Každá baterie, a obzvláště motocyklová potřebuje čas od času plně dobít. Pro správnou údržbu doporučujeme použití některého z moderních typů automatických nabíječek (viz. obrázek CTEK). Tyto přístroje mají přímo deklarováno uzpůsobení pro nabíjení baterií AGM.
